

WEATHERPROOF HIDDEN SOCKET

A premium electrical solution designed for outdoor and moisture-prone environments. This IP65-rated socket offers superior protection against water and dust, making it ideal for gardens, bathrooms, or outdoor workspaces. The sleek grey housing features a robust hinged cover that maintains waterproof integrity when closed, whilst providing easy access when needed. The universal socket design accommodates multiple plug types, offering versatile connectivity options. The hidden socket mechanism ensures a clean, sophisticated appearance when not in use, seamlessly blending with your space. Built with durability in mind, this socket combines practical functionality with weather-resistant properties, perfect for both residential and commercial applications where standard sockets wouldn't suffice. The secure mounting system and quality construction ensure long-lasting performance in challenging conditions.

SPECIFICATION

WATERPROOF PROTECTION: IP65-rated waterproof socket design ensures complete protection against water splashes and dust ingress

HIDDEN DESIGN: Concealed socket installation with a sleek grey cover that maintains aesthetic appeal while providing functionality

UNIVERSAL COMPATIBILITY: Features multi-standard socket outlet that accepts various plug types for versatile usage

SECURE CLOSURE: Durable hinged cover with robust locking mechanism ensures reliable protection when closed

EASY INSTALLATION: Professional-grade construction with mounting points for straightforward and secure wall fitting

Product Code	GX-7290
Socket Module	13A Universal
Product Size	86 x 92 mm
Material	Metal, Plastic
Insulation Hole Distance	60 MM
Rated Power	2500 W
Rated Voltage	250 ~
Rated Current	13A
